Journal of Engineering Mathematics **37:** 403–404, 2000.

Contents of Volume 37 (2000)

Vol. 37 Nos. 1–3 February 2000

Contributions to Theoretical Mechanics: A Special Issue in Honour of Professor A. J. M. Spencer FRS

Guest Editors: J. M. Hill and A. P. S. Selvadurai

J. M. Hill and A. P. S. Selvadurai: A. J. M. Spencer FRS 1–9

D. Clements and T. Cooke: Deformations of carbon-fiber-reinforced yacht masts 11–25

S. C. Cowin and G. Yang: Material symmetry optimization by Kelvin modes 27–43

A. H. England: Finite elastic deformations of a thick semicircular fibre-reinforced shell 45–64

J. B. Haddow, L. Favre and R. W. Ogden: Application of variational principles to the axial extension of a circular cylindrical nonlinearly elastic membrane 65–84

M. A. Hayes and G. Saccomandi: The Cauchy stress tensor for a material subject to an isotropic internal constraint 85–92

J. M. Hill: Finite elastic eversion of a thick-walled incompressible spherical cap 93–109

R. J. Knops: Alternative spatial behaviour in the incompressible linear elastic prismatic constrained cylinder 111–128

J. G. McIntosh and F. M. Leslie: Flow induced surface switching in a bistable nematic device 129–142

N. V. Movchan and J.R. Willis: Surface-breaking crack in an elastic half-space 143–154

A. P. S. Selvadurai: An inclusion at a bi-material elastic interface 155–170

M. H. B. M. Shariff and D. F. Parker: An extension of Key's principle to nonlinear elasticity 171–190

R. Staroszczyk and L. W. Morland: Orthotropic viscous response of polar ice 191–209

T. Timarci and K. P. Soldatos: Vibrations of angle-ply laminated circular cylindrical shells subjected to different sets of edge boundary conditions 211–230

Antoinette Tordesillas and Jingyu Shi: The frictionless rolling contact of a rigid circular cylinder on a semi-infinite granular material 231–252

D. P. Williams and R. V. Craster: Cagniard-de Hoop path perturbations with applications to non-geometric wave arrivals 253–272

Q.-S. Zheng and W.-N. Zou: Irreducible decompositions of physical tensors of high orders 273–288

Vol. 37 No. 4 May 2000

T. Boeck and U. Bahr: Temperature distribution in an array of moving cracks acting as heat sinks 289–303

A. R. M. Primo, L. C. Wrobel and H. Power: An indirect boundary-element method for slow viscous flow in a bounded region containing air bubbles 305–326

S. E. Mikhailov and I. V. Namestnikova: Stress-singularity analysis in space junctions of thin plates 327–341

Yu. A. Rossikhin and M. V. Shitikova: Analysis of nonlinear vibrations of a two-degree-of-freedom mechanical system with damping modelled by a fractional derivative 343–362

Z. Zong and K. Y. Lam: Hydrodynamic influence on ship-hull vibration close to water bottom 363–374

J.-C. Suh: The evaluation of the Biot–Savart integral 375–395

Short Communication

A. R. Kacimov: Note on a paper by Sinha and Odgaard "Application of conformal mapping to diverging open channel flow" 397–400
